Objectives

Seeking a summer internship with a focus on design strategy and/or interaction design within a dynamic and challenging environment.

Professional Experience

Freelance Web Designer

Travelling July 2007 - Present

- Designed and implemented an artist's portfolio site in 2 days.
- Redesigned a communications coaching website.
- Designed and implemented a commercial website for a baseball training device. This project entailed implementing a shopping cart utilizing PHP.

Professional Services Engineer / Manager

Omniture, CA Nov 2004 - Apr 2007

- Responsible for the implementation of search and content management systems.
- Designed and implemented innovative client solutions tailored to specific requirements.
- Designed search interfaces (interaction and layout) using client input, and companies' best practices.
- Responsible for training clients and coworkers on product functionality, implementation processes and best practices.
- Managed engineers, responsibilities included assigning work, maintaining timelines and project plans and quality control.
- Client account management.

Reporting / Technical Support Specialist

Middlebury College, VT Jul 2002 - Sept 2004

- Provided database programming and reporting for a multi-disciplinary team in the implementation of a new, system-wide data infrastructure.
- Responsible for developing campus-wide reporting structure and methodologies.
- Designed and implemented a travel itinerary application that scheduled, and tracked all appointments made by admissions officers.

Web Developer

Middlebury College, VT Sept 1998 - Jun 2002

- Designed and maintained the Middlebury College Dining Services website. Responsibilities included maintaining site consistency and content management.
- Designed, tested and implemented an application that dynamically displayed dining menus.
